SOCCERBOT360 PLAYLIST

AUTOMATED TRAINING AND ENTERTAINMENT SESSIONS

SoccerBot360 Playlist - One Click. Fully Automated Sessions

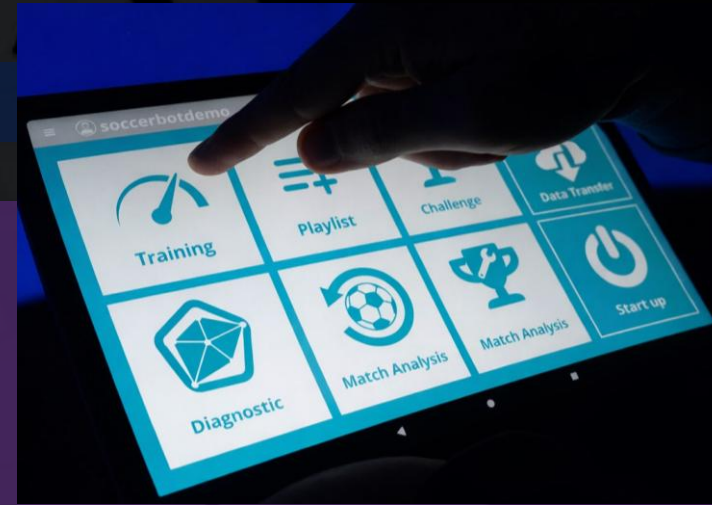

Create, save and run complete training, testing and entertainment programs automatically

**SOCCER
BOT360**

What is the **Playlist Feature**?

The SoccerBot360 Playlist allows operators to automate complete sessions directly from the Steering Tablet.

Training modes, difficulty levels and repetitions are pre-configured in advance and then executed automatically from start to finish.

The system automatically:

- switches modes
- rotates players
- manages multiplayer sessions

Operators can:

- adjust sessions at any time
- add/remove players
- modify intervals w/o interruption

Ideal for:

- youth training
- skill assessments
- birthday parties
- team events

SoccerBot360 Playlist – Use Cases

Automated training and entertainment sessions directly from the steering tablet

Where can Playlists be used?

TRAINING PLANS

Training sessions tailored to age and skill level, created as reusable playlists and played automatically.

U8 / U10 / U12 / U14 / U16 / U18 / Adults

SKILL ASSESSMENT

Consistent testing protocols for reproducible performance measurements — comparable across teams and time periods.

EXAMPLE: Benchmarking by age groups

ENTERTAINMENT PROGRAMS

Pre-configured workflows for children's birthdays, company events, and team-building activities — ready to start without preparation.

Birthday parties · Team events · Public zones

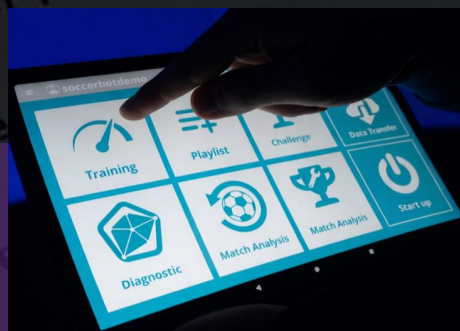

SoccerBot360 Playlist – 3-Step Session Setup

Automated workflow – with the ability to intervene manually at any time

SOCCER BOT360

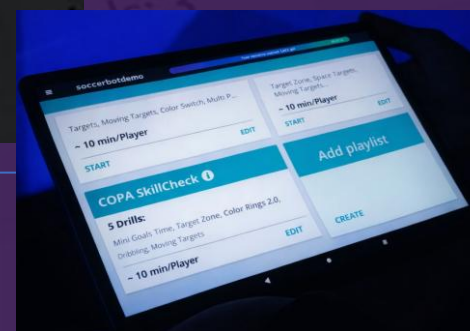

How does it work?

- Fully automated session flow
- Automatic player rotation
- Multiplayer automation
- Manual adjustments at any time

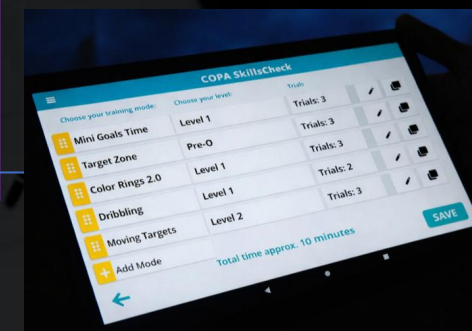

Select "Playlist" in the main interface of the SB360 Steering Tablet.

Step 1

Create a playlist by selecting the desired training modes, levels, and number of trials.

Step 2

Start the playlist and let SoccerBot360 handle the session flow automatically.

Step 3

Coaches focus on coaching — not operating the system.
